Mobile: +91-7579409345

SKILLS

Languages: C, C++, Python, Java, Kotlin

Tools/Platforms: Git, GitHub, Linux, TensorFlow, NumPy, LangChain, RAG Pipelines, Spring Boot, Spring Data JPA, Postman

Soft Skills: Problem-Solving, Goal-Oriented, Time Management, Adaptability

PROJECTS

RESTful Student Records API

Jul' 2026

- Developed a RESTful Student Management API using Spring Boot, implementing complete CRUD operations with proper HTTP methods, status codes, and RESTful endpoint design.
 - Designed a layered architecture (Controller-Service-Repository) with DTO-based request and response models, ensuring clean separation between API contracts, business logic, and persistence.
 - Implemented soft delete, centralized global exception handling, input validation, and custom exceptions to improve data integrity, error handling, and overall API reliability.
 - Integrated Spring Data JPA with MySQL for efficient database operations, tested all endpoints using Postman, and followed modular, maintainable coding practices suitable for scalable backend applications.
- Tech Stack: Java, Spring Boot, Spring Data JPA, MySQL, Postman

RAG-Based Document QA System

May' 2026

- Developed a Retrieval-Augmented Generation (RAG) pipeline capable of answering user queries from unstructured PDF and text documents using semantic search and LLM-powered response generation.
 - Built a FAISS vector database using Sentence Transformer embeddings to enable fast, context-aware document retrieval and improve answer relevance.
 - Integrated LangChain with the Groq LLM to create a modular retrieval and generation workflow, supporting efficient prompt construction and context injection.
 - Implemented document ingestion, text chunking, embedding generation and semantic retrieval to deliver accurate, context-aware answers from large document collections.
- Tech Stack: Python, FAISS, LangChain, Groq LLM

TRAINING

Skill Development LPU | Fundamentals of DSA using C++

Jun'25 – Jul'25

- Strengthened problem-solving skills by mastering core Data Structures.
- Strengthened analytical and problem-solving skills by solving a wide range of algorithmic problems focused on time and space complexity optimization.
- Applied DSA concepts to build real-world management systems like Hospital and Student Database systems.

CERTIFICATES

- Build Generative AI Apps and Solutions with No-Code Tools | Infosys
 - ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM | Infosys
 - The Bits and Bytes of Computer Networking | Google
 - Computer Communications, offered by University of Colorado | Coursera
 - Udemy Artificial Intelligence A-Z 2024 Certificate | Udemy
- Aug' 2025
Aug' 2025
Sept' 2024
Aug' 2024
Jan' 2024

ACHIEVEMENTS

- Patent Filed: AI Based Neuromodulation System – Application number: 202511052494
 - Solved 600+ problems on Leetcode.
 - 3rd Runner-Up, BinaryBlitz 2024 Hackathon – Designed and implemented an ML-powered spam Email detection model, achieving high classification accuracy on real-world email data.
- May' 2025

Mar' 2025

EDUCATION

Lovely Professional University
Bachelor of Technology - Computer Science and Engineering (AI & ML) CGPA: 8.38

Phagwara, Punjab
Aug' 2023 – Present

RPS Sr Sec School
Intermediate; Percentage: 80.2

M-Garh, Haryana
May' 2023
